INTELLIGENCE & CYBER DIVISION

Fulfilling your requirements with decades of military Intelligence and Cyber experience.

Inzpire's Intelligence and Cyber Division is comprised of a team of experts with decades of experience in delivering outstanding results for military, government, and industry customers.

Our expertise spans from the delivery of full spectrum Intelligence Analyst courses to delivering training exercises to whole sectors of:

- Critical National Infrastructure
 - Government
 - Military

HIGH IMPACT CYBER RESILIENCE EXERCISE

Inzpire's expert facilitators can exercise your people and processes through the entire cyber security framework life cycle:

Identify - Protect - Detect - Respond - Recover

Decades of experience in delivering high impact exercising makes us experts in taking you through the process of making good decisions in demanding high-pressure situations.

INTELLIGENCE & CYBER DIVISION

Designing and Delivering Innovative Training.

Inzpire's instructors utilise their subject matter expertise and experience with innovative and facilitative teaching methods to deliver engaging and practical lessons across a breadth of Intelligence, Cyber Security and Resilience practices.

Our training courses are flexible and adaptable to meet your specific requirements.

Inzpire is currently designing and delivering training to the UK MoD, including:

- Designing Intelligence Training
- Cyber Resilience Training
- Delivering Intelligence Fundamentals

METHODS & MEDIA

An Inzpire classroom combines a range of methods and media to bring each topic to life. Students are immersed in practical activities to apply the knowledge they have been taught.

The exercises may utilise our Moodle Learning Platform or an innovative training aid designed by our instructors. Each one chosen to enhance the learning experience.

CONSULTANCY

Our Intelligence or Cyber consultant will support and assist from conducting an initial training analysis to delivery of a bespoke training course suited to your requirements.

In addition, our Cyber consultancy will provide an overview of how your people should conduct themselves in cyberspace and make them aware of the potential threats that they could face.
